

PPL companies

CHECKLIST FOR COMPLETING COMMERCIAL REBATE APPLICATION:

- Complete and submit the Application Form and applicable support documents for each facility.
- Application Form
- Support Documents
 - Lighting
 - A/C Units
 - Motors/Pumps
 - Variable Frequency Drives
 - Refrigeration
- Include all applicable account numbers, the service address(es) and name for each facility.
- Include the Tax Identification number. For tax-exempt organizations, please include the tax-exempt information (i.e. copy of tax-exempt certificate).
- Include the Target Completion Date. This is required for approval and to reserve your rebate funds.
- Please contact us if you have any questions. Otherwise, you can either fax, e-mail or mail your completed application to us.

Objectives of the Program:

The Commercial Rebate Program provides cash incentives to our commercial customers to help offset the costs of replacing aging, less efficient equipment. This program encourages commercial customers to make qualified energy-efficient equipment upgrades to help lower their facilities' overall energy costs and usage. These improvements in turn help reduce overall energy demand on the electric system.

Who is eligible for the Commercial Rebate Program?

The Commercial Rebate Program is available to all LG&E and KU commercial customers who contribute to Demand Side Management as part of their monthly bills.

- Industrial customers are not eligible to participate in the program at this time.

What is covered under this Program?

- Commercial rebates are available for the following equipment that has been upgraded or replaced since April 2008:
High-Efficiency Lighting — A/C Units — Motors/Pumps — Refrigeration
- Rebate allocations are determined based on the reduction in energy demand and the amount of energy saved. To ensure fairness, all commercial rebates are limited to a maximum of \$50,000 per facility per year.

How do I apply for a Rebate?

- Review the program and equipment requirements on the rebate application.
- Submit the signed application and support documentation by fax to (502) 217-2922, by e-mail to Rhonda.truman@lge-ku.com or by mail to: Commercial Rebate Program, c/o Energy Efficiency Operations – 2nd Floor, 220 W. Main Street, Louisville, KY 40202.

What are the next steps in the rebate process?

- Eligible customers will receive a confirmation form upon application approval.
- Customers will be required to return a completed confirmation form with proof of purchase and payment, as well as spec (data) sheets for each type of installed equipment.
- Rebates will be issued in the form of a check within 45 days after the Confirmation Form is received, processed, site verification completed (if applicable) and the rebate is approved.

What is site verification?

- Installations may be subject to site verification. During site verification, our business partner will confirm quantities and the installation and operation of each type of equipment listed on the Installation Confirmation Form(s).
- If your facility is selected for site verification, you will receive notification from our business partner. The business partner will schedule an on-site visit to your facility. Someone from your facility will need to accompany our business partner during the site verification. All rebate payments will be withheld until site verification is complete.

What else do I need to know?

- Customers are not required to have an energy audit completed by LG&E or KU to qualify for rebates.
- Customers select the appropriate vendor of choice to supply and/or install the equipment for this program. Customers can also choose to self-install the equipment.
- Installation labor costs are not eligible for rebates.
- The rebate amounts cannot under any circumstance exceed the cost of the equipment.
